Roslindale

Originally part of the independent town of Roxbury, Roslindale was a farming community well into the 19th century. Construction of the Boston and Providence Railroad in 1834 opened up the area for residential development. One of the first to take advantage of the area's new proximity to Boston was Henry Grew, founder of the Meredith and Grew real estate company, whose large estate now forms part of the Stony Brook Reservation and the George Wright Golf Course.

Roslindale seceded from Roxbury in 1851, along with West Roxbury and Jamaica Plain, and incorporated as the separate town of West Roxbury. Referred to for years as "South Street," the area received its name in 1870, reportedly because it reminded one resident of the historic town of Roslin, Scotland. The extension of streetcar lines - first horse-drawn, then electric - in the late 1800s caused the farms and large estates to be subdivided, first for single-family and then for multi-family housing.

Roslindale became part of Boston with the annexation of the town of West Roxbury in 1874.

A quiet, suburban part of the city for many years, Roslindale Square is the commercial center. After suffering from competition by suburban shopping centers in the 1960s and 1970s, it has been revitalized in recent years by the success of its pioneering "Main Street" program.

i. Census Geography of Boston

ii. List of P (Population) and H (Housing) Tables in the Summary File 3 (SF3).

i. NOTES TO THE READER

1. Two of the important US Census 2000 data files used in the compilation of demographic reports are Summary File 1 (SF1) and Summary File 3 (SF3). SF1 uses the Short Form questionnaire while SF3 uses the Long Form Questionnaire. Moreover, SF1 is a 100% count giving data to the smallest level of census geography, the Block. SF3 is a sample count of 16% of the population giving data to the Block Group level which is a cluster of Blocks. In the aggregation of SF3 data for this report, the Planning Districts straddle Block Groups boundaries. These will have slightly different numbers from those aggregated using the SF1 data. Total population of the planning district, for example, the South End based on SF1 may show slightly different numbers if compiled using SF3. (See Appendix for a brief description of census geography. Short Form and Long Form Questionnaires can be found on the US Census Bureau website, American FactFinder: <http://factfinder.census.gov>)

2. Because of changes in the boundaries of Block Groups between 1990 and 2000, precise comparison of 1990 and 2000 data on Planning Districts/Neighborhoods is not possible.

3. Racial categories of population are limited to six. Hispanic population may be included in any racial group. White alone population includes Hispanic whites. The category of persons belonging to One or More Races is termed Multiracial.

4. Numbers within parentheses at the end of the table title represent table numbers assigned by the US Census. These table numbers are useful in accessing data using American FactFinder for different types of geography such as a Census Tract or a city. A list of P (Population) and H (Housing) Tables, which provide data at the Block Group level, is given in the Appendix. **This report aggregates only Block Group level data as done for all the Planning Districts. However, data available only for Census Tracts can be aggregated to Boston city to generate a more extensive set of characteristics. Complete census tract data can be found on the US Census website.**

5. While variables are retained in their original form, some of their class intervals have been aggregated into fewer intervals to make the tables simpler.

6. Some tables include additional derived data such as medians or per capita incomes.

7. For definition of terms, please see "Census 2000 Glossary", which is published as a separate document (Report # 568) by the BRA .

8. Income-related data such as household income, poverty rates, etc. refer to year 1999.

Summary: The author discusses the importance of the role of the nurse in the management of the patient with a chronic illness. The author emphasizes the need for the nurse to be a patient advocate and to provide emotional support to the patient. The author also discusses the importance of the nurse to be a patient educator and to provide information to the patient about the illness and the treatment options. The author concludes by stating that the nurse's role is to provide a holistic approach to the patient's care, addressing both the physical and emotional aspects of the illness.
